ECLETTICA

VISION

With our range of products, we are specifically focusing on the ecological aspects connected to a new lifestyle, where the outdoors symbolize being in touch with nature, where boundaries disappear and change. Our systems, working with renewable energy sources, are a valid answer to the need to preserve the world that we share with all living beings, to respect it and to keep it untouched.

MISSION

The legacy we have been carrying on for over thirty years is a centuries-old tradition, strongly connected to the Earth and its bounty. Our mission is loyal to the spirit of cultivating, ploughing, manuring, watering, and harvesting. Faithful to our model, we cultivate human relationships and coordinate production with harvest seasons – just as it happens in nature. This *modus operandi* helped us to create a design tailored to evolving markets, and consolidating an organic, consistent set of corporate ethics that creates value and opportunity.

ISOTHERMAL PERGOLA

ECLETTICA

Eclettica is a pergola with a false ceiling equipped with a membrane and panels aimed at reflecting sound waves on its walls. The roof is suitable for the installation of solar panels that produce energy from renewable sources. Eclettica is a harmonic synthesis of different technologies, to meet the growing demand for ecological solutions, as well as the requirement for all-round comfort that satisfies all senses, from the acoustics to the visuals. The sober, simple, and essential lines are the distinguishing feature of the product: Eclettica looks forward, witnessing encounters between communities and nature, generating precious renewable energy, and being an inspiration for moments of pure relaxation. The warm colors and the mat finish, painted with high-resistance epoxy powder, improve the product's quality and durability, giving Eclettica a cozy look that is in harmony with natural elements. The structure can be complemented with a number of accessories, such as sliding edging profiles with PVC or glass membranes, decorative drapes, telescopic and windshields made of glass.
